

Protocol for the Management of Choking in Adults

Encourage the patient to cough but do nothing else, get patient still and attempt:

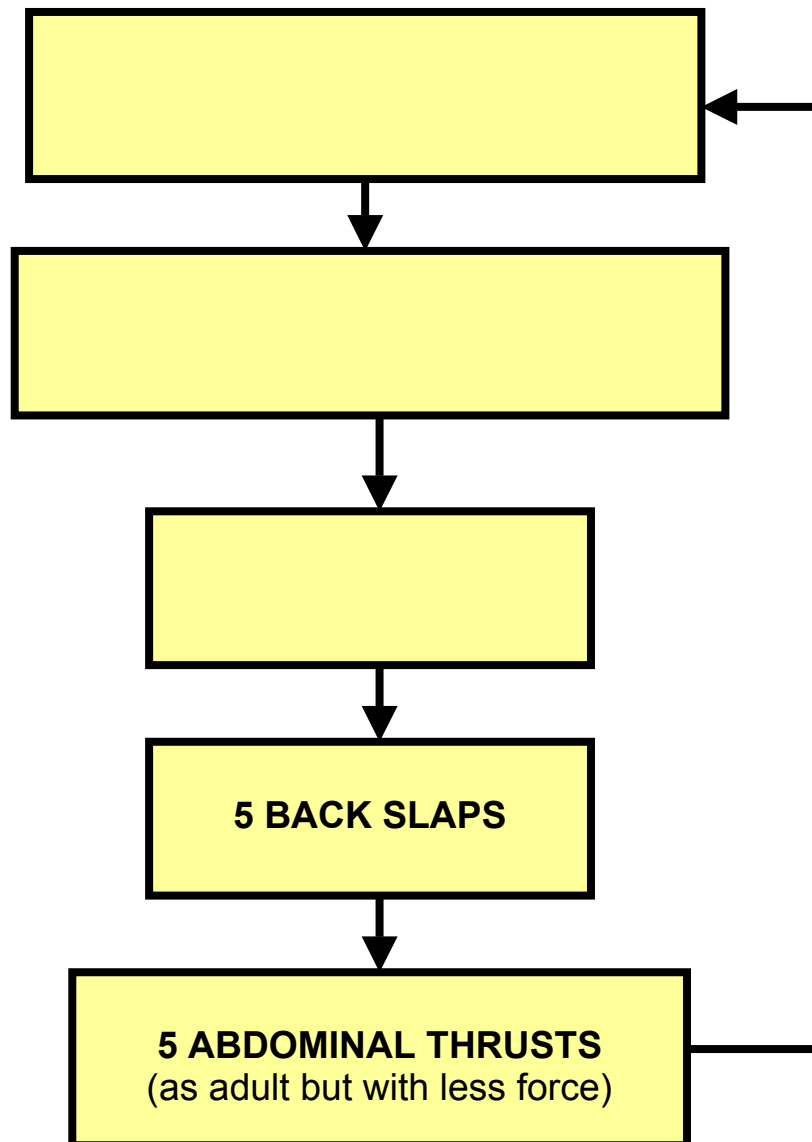

Alternate until obstruction is removed or professional help arrives.

Protocol for the Management of Choking in an Unconscious Adult

**Protocol for the Management of Choking in
Children > 1 Year Old**

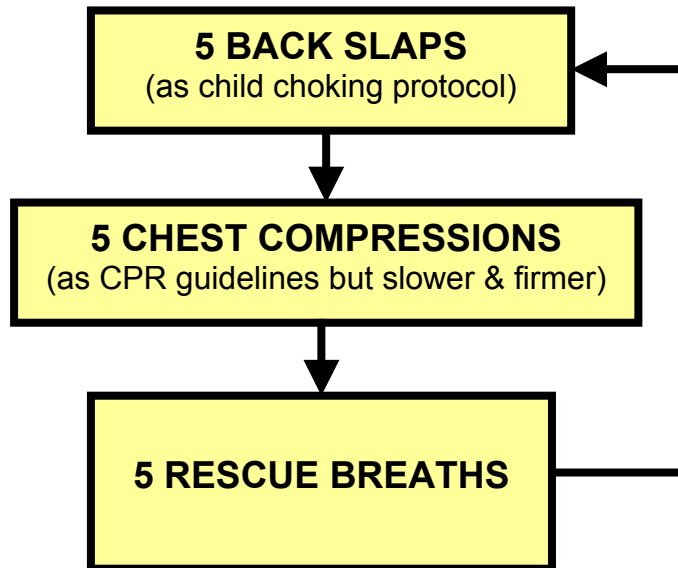

Encourage the child to cough but do nothing else, get patient still and attempt:

**Protocol for the Management of Choking in
Infants < 1 Year Old**

**ONLY ATTEMPT THIS PROTOCOL IF THE BABY IS MAKING
NO EFFORT TO BREATHE ON THEIR OWN.**

At no point attempt to clear obstruction by blindly using finger sweeps in infants.

**NEVER ATTEMPT ABDOMINAL COMPRESSIONS ON
INFANTS < 1 YEAR OLD**
